THE REDCLIFF REVIEW THURSDAY, JAN. 7th, 1932

Number 13

Mrs H. C. MacDonald Passes Last Week

Remains Sent to Creston, B. C. For Interment

After a lingering illness Mrs. H. C. MacDonald, wife of the manager of the Imperial bank here, passed away at her home here early last Tuesday morning. Deceased came to Redcliff a few months ago from Brandon, Man., and has been confined to her bed ever since suffering from an incurable illness.

Besides her husband the late Mrs. MacDonald, who was in the prime of life, leaves two sons, aged 10 and 5 years. Her sister from Creston, B. C., has been with her for the past few weeks.

The remains were sent to Creston for interment.

Mr. MacDonald and his two boys have the sincere sympathy of the community in their very sad bereavement.

The late Mrs. MacDonald was born in Prince Edward Island 40 years ago. In 1916 she came west and resided and other parts in western Canada. During her life she was an active part in the work of the Presbyterian church. The funeral at Cranbrook was conducted by Rev. M. S. Blackburn of St. John's church, Medicine Hat, assisted by Rev. McLean Bell, of Knox Church, Cranbrook.

Floral tributes were: harp, husband and children; broken circle, father, mother and sister; Tweed Lodge, A. F. & A. M., Brandon; and George Kerr, Elfr. Presb. Church, Brandon.

Mr. and Mrs. J. W. MacDonald, Portage la Prairie; Mr. and Mrs. A. G. Smith, Chapman Camp, B. C.; A. E. Hines, Kimberley; Mr. and Mrs. E. Marshall, Balgonie; Mr. and Mrs. F. MacPherson, Mr. and Mrs. J. D. McGilley, Mr. and Mrs. J. Taylor and family.

Mrs. Taylor, of Cranbrook, sister of deceased, is at present in town with Mr. MacDonald and the boys.

Europe Complains Against War Debts

Unless Germany Pays Others Claim They Cannot

A news report from London says: Complaints against paying war debts to the United States are growing daily in Europe.

Many statesmen and economists particularly in France declare it is economic suicide of the world is such that unless Germany pays her reparations, further instalments to the United States are impossible.

Others, including British economist, Sir George Pish, insist payment of war debts will bankrupt the world. Some observers claim that Britain never will apply, but in hand, for remission from the United States.

LEGION MEETING

The general monthly meeting of the local Legion will be held in the club room on Sunday afternoon next at 3 o'clock. A full attendance is desired.

Mr. Hicks spent Christmas in Calgary with her daughters. Mrs. Millard was there also.

Members May Cut Their Own Salaries

Will Also Merger, Police Force As Economy Move

The Lethbridge Herald says it has good authority for saying: "A ten per cent. cut in the seasonal indemnity of members of the legislature, \$200 a year, was the economy step taken by U. F. A. members meeting in the provincial caucus in Edmonton last week. The caucus voted for this salary reduction after a careful study of the general financial position of the province which, it was made clear, demands stringent expenditure curtailment."

"I am further understood that a sharp division developed over the merging of the Alberta Provincial Police with the R. C. M. P., placing the policing of the province in the hands of the latter force. The premier, it is said, was quite decided on the matter, strongly favoring the change, and his view eventually won out and the transfer will be made."

And here is more good gossip from the recent caucus. There will be legislation brought down at the next session, imposing duties on trucks and bus operators, but just how far it will go is not learned. The Alberta house will open Feb. 4th.

George Dickson shipped a car load of horses to Ontario last week.

Mr. H. P. M. Husby, who has been relieving Mr. MacDonald in the bank here for the past few weeks, left Wednesday for his home in Newdale, Sask.

Mr. J. L. Wright returned home from the hospital last week and after undergoing two operations. He is now improving satisfactorily.

There have been many bridges as to which is the longest bridge in the world, but Lens and Culbertson appear to be solving the problem in New York, with their 1500 rubber contest.

Churches

GORDON MEMORIAL

UNITED CHURCH
Pastor Rev. H. Epling-Jew
Sunday, January 10th, 1932.
10 a. m. Church School.
11:15 a. m. Morning Worship

11 a. m. and 8 p. m. Services.
11 a. m. and 8 p. m. Services.
7:30 p. m. Evensong and sermon.

Red Cross Collections

The officers of the Redcliff branch of the Canadian Bible Society wish to thank the citizens for their support to this fund, and also their collection of the following:

Mrs. Congram	\$5.00
Mrs. Fairbank & Sourly	3.50
Mrs. Lowens	4.00
Mrs. Cann	7.45
Jean and Ruth Pow	4.85
Phyllis Sanderson and Francis Buchholz	3.10
Collection at Linton Lecture, Gordon Memorial	8.20
Total	\$40.10

This amount has been forwarded to Rev. H. D. Mitz, District Secretary C. B. S. at Calgary.

Emma W. Cain, Secretary Redcliff Branch

MANY PROPOSALS FOR U. F. A. CONVENTION

Resolutions affecting many phases of the life of the Alberta farmer have been prepared by the United Farmer lands to be submitted to the annual convention at Edmonton, from January 19th to the 23rd.

Some of the topics upon which resolutions have been prepared are: Bank Act amendment, investigation of the monetary area, state's medicine, merchants' names of relief, etc. The Act amendment, however, is not yet ready for consideration. The investigation of the monetary area is not yet ready for consideration.

SCHOOL NEWS

High School Literary Elects its New Officers

At a meeting of the High School Literary Society on Monday, January 4th, the following officers were elected for the second term of the school year:

President—James Brown.
Vice Pres. and Chairman of Program Com.—Leonard Larson.
Editor in Chief—Irene Buchholz.
Sec. Treas.—Annie Shaw.
Sub Editors—Jim Lowens and Jean Paterson.
Com.—Dan Jensen.
Boys' Sport Captain—Leonard Larson.
Girls' Sport Captain—Irene Buchholz.
The Literary Society of 1932 promises to be a greater success than that of 1931.

LOCAL MASONIC LODGE INSTALLS OFFICERS

At a joint installation held in Medicine Hat on December 28th, the following officers of Quarry Lodge were elected:

W. M.—R. C. Harrave.
I. P. M.—R. J. Cann.
S. W.—H. G. Sheasby.
J. W.—C. T. Hall.
Chap.—Wm. Henderson.
S. D.—A. J. Leamonth.
Treas.—G. H. Worts.
J. D.—J. Lakey.
S. S.—E. Ward.
J. S.—W. Pickering.
D. C.—R. S. Hodge.
Rev.—E. L. Stone.
Organist—H. J. Cox.
Tyler—H. Champ.

Exchange Rates Are Costing Canada Much

Municipalities Have to Pay Difference For Debentures

The high rate of exchange between Canada and United States currency is costing a number of municipalities in Canada considerable money when making their debenture payments. In this regard Redcliff is no exception and will mean several hundred dollars to its town this year. Some municipalities have written to the Utilities Commission for advice and have been informed that the difference will have to be paid and listed as a special emergency item, chargeable to the contingency fund.

BRITAIN OUT FOR ARMAMENT REDUCTION

Reduction of the size of battleships, complete abolition of armaments and a maximum of 8000 tons for cruisers. These are the spearhead of the British government's effort to force a reduction of armaments at the forthcoming Geneva conference, according to the naval correspondent of the Daily Mail. There is a very indication that the British government will go to Geneva determined this time to find relief from the staggering burden of armaments and will not be ready to yield at the first sign of opposition from foreign powers. This is a long way. Here a hope it will take up and clear all the depression clouds of 1931.

Glassworkers' Ball Was Great Success

Deuce Old Year Out and the New Year In

The Glassworkers' annual ball held in the CHH Hall on New Year's Eve attracted a large crowd, and so well was the program carried out that financial depression and hard times were relegated to the back ground for the evening, and all said goodbye to the old year with pleasure and ushered in the new with that spirit of joviality and abandon which is characteristic of the west.

During the evening several prizes, for which prizes were given, were won by Misses O. Beiler and J. Peterson, and Messrs. L. Bainbridge and T. Mignault.

The evening was pronounced a great success and many expressed the hope that the boys would put on another in the near future.

Here and There

A new railway record, and a different one, was established recently when the Canadian Pacific's Vancouver office of the Canadian Pacific Railway Co. was able to ship a carload of apples in 10 days.

Canada's milk production in September hit a new record. 222,000 cwt. as compared with 217,000 cwt. in August.

And now the eyes of the world are focused on that greatest of all have weather transmutations. Just a good old Christmas card.

One can visualize thousands of pairs of skis being used, and the world will be a different place. The world will be a different place. The world will be a different place.

And speaking of Quebec, just yesterday, who was on the way to the Quebec winter sports, and a small staff of instructors, Canada. Incidentally here's a new performer of the place.

Pacific Coast ports and inland shipping circles throughout Canada, are naming the new winter sports, and a small staff of instructors, Canada. Incidentally here's a new performer of the place.

Sino-Japanese war reports are causing more apprehension to be manifested than in previous times. China, for example, is almost as confident in its present phase as was its partner with the world. China, for example, is almost as confident in its present phase as was its partner with the world.

The Regina Rough Riders are a rough lot. They are a rough lot. They are a rough lot. They are a rough lot.

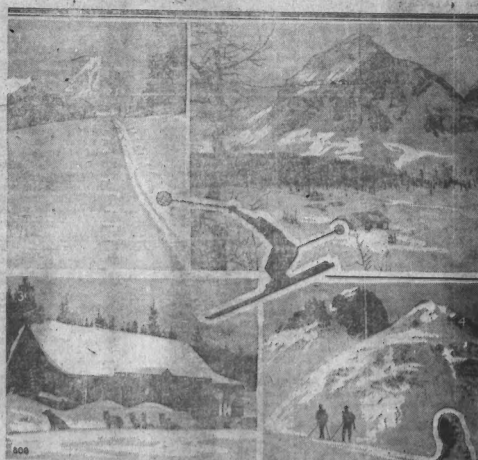

"The Four Hundred" has been a long time coming. It has been a long time coming. It has been a long time coming. It has been a long time coming.

With the Canadian dollar where it is in the market, there is a tendency to think of the dollar as being a home and many Canadians are spending a winter in the United States. Fifteen per cent. of the dollar is the British Columbia dollar.

There are 12,500 salmon or trout in Canada, caught by the Canadian Pacific Railway Co. in 1931. The Canadian Pacific Railway Co. is a rough lot. They are a rough lot.

There are 12,500 salmon or trout in Canada, caught by the Canadian Pacific Railway Co. in 1931. The Canadian Pacific Railway Co. is a rough lot. They are a rough lot.

Slit Runners of the Canadian Rockies

With a field of activity unexcelled the world over the new winter sports season attracts the thrill hunters of the Canadian Rockies. The new organization is patterned largely after the famous Tilt Runners and its locale, unexcelled for rival runs in Europe, is found in the heart of the Rockies, with runs and trails varying from one to ten days in duration and covering such world famous objectives as Mount Aspinhead, Simpson Pass, Shadow Lake, Lake Louise, Fairmont Valley and Fair. Boy Lake and Cascade Pass, sliding over some of the most beautiful and exciting in the valley below. But the most begins in November each year.

A thousand feet above Banff and about an hour from the town is the ad. lodge built on the pass between Mount Norquay and Snowy Mountain. From the club house runs radiate in all directions with cables and skiers at strategic points for rest and refreshment. There is a winter jump at Buffalo Park and outside jump course. Lay-out shows 11 ski runs across snow with 241. Aspinhead, 11,000 feet high, in background; (2) Canadian Pacific Bldg. (3) New Canyon as seen from the ski run; (4) Mount Norquay Bldg. (5) Lake Louise as seen from the ski run; (6) Fairmont Valley as seen from the ski run; (7) The Towers on Wonder Pass, near Mt. Aspinhead, one of the finest winter scenes in the Rockies.

ENO'S FRUIT FLAVOR

The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be healthy is to be healthy.

ENO'S "Fruit" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

Why The World Is Sick

Reviewing all that the world has passed through in the years 1914 to 1921, considering the deplorable state of affairs existing in the world today, and, at the beginning of a new year, looking into the immediate future, one would expect all people, of all races, nationalities, languages and creeds, who possess an atom of intelligence and a modicum of common sense to solemnly vow "Never again."

During the frightful years of human anguish and suffering of the world war people were sustained, even uplifted, by the hope, the expressed declaration, that it was a war to end all wars; that when the strife and agony was ended, a new and brighter day would dawn for this old world, the commencement of an era of happiness, progress and prosperity unparalleled in the history of mankind. Brought up with these hopes, inspired by this bright vision, people labored and sacrificed and suffered contented that their children and children's children through generations to come would reap the benefit.

But disillusionment has come. The nations of the world were not purified in the fire of war; the selfishness and greed of man were not consumed. The huge debts which the war imposed on each nation are crushing the people, but instead of a willingness to mutually and amicably adjust these burdens, or, as there should be, a keen anxiety to do so, with the strong helping the weak, the nations with war-like ferocity seem bent on making the "other fellow" pay to the last farthing. Like school boys, they demand their pound of flesh, caring not that thereby all are loaded toward the abyss of destruction.

And individuals, like nations, display the same selfishness, and even greater greed. For the losses they sustained during the war, they seem determined to recoup themselves. And so abundant payment they are demanding for the allegedly patriotic sacrifices they made during the war period. They apparently care not that such payment to them means ruin to others, and they about as much care with the ruin of these others as they must inevitably fall upon themselves.

And so, nearly a decade and a half after the joyful announcement of the armistice and the coming of the long hoped for peace, there is as much suffering throughout the world as during the war years, possibly less in some countries but much more in others. The same great wealth of natural resources, provided by a benign Providence, exists; the needs and desires of man are as great as ever; the means are at hand to utilize the world to meet the requirements of the world. But selfish man says "No." He refuses to consent to anything to help his fellow man, but selfishly thinks only of self, and demands that all others shall help him while he holds back the aid he might extend.

Thus each nation builds economic barriers against all other nations; each is at war with all others in an attempt to out-manoeuvre them, to make progress while all others decline. And so all suffer, not one is making progress, all are on the decline. Again, what is true of nations, is true of individuals. One industry makes demands for itself alone, regardless of the effect on other industries, forgetting that if these others suffer, it, too, must suffer; if they perish, it, also, must die.

The world war to end all war failed in its object. War rages today between the nations as never before. If it is a world war, more embracing in fact than the colossal struggle of 1914-1918, it is being fought by different methods, that is all. It is piling up national debts higher than ever; it is steadily, even rapidly, increasing the burdens of taxation; it is destroying trade and commerce; it is making men, women and children naked, cold and hungry. The great War did not provide employment for all the present economic world war has thrown millions out of employment, and the number steadily increases. It is undermining the health and the morale of countless thousands of people.

The picture is a dark, a gloomy one. It is, however, futile to delude ourselves. It is idle to cry peace, peace, when there is no peace. The only salvation for the world is a return to sanity. The world is just what the people of the world make. If they insist on fighting each other, whether in a physical or economic sense, why fight they will. But in seeking and striving to destroy them most assuredly cannot build up and prosper. The world must turn from its present ways before it can recover from its sickness. It is not a shortage of food, nor over-production, nor even present ineffectiveness that is the trouble. It is the people and their prevailing outlook on life, their individual and narrow nationalistic selfishness that is the root cause of the world's sickness and depression.

Unlabeled Automobile Authorities investigating supposed frauds in connection with "unlabeled" compulsory automobile liability insurance have located this "unlabeled" automobile in the east of the country. During two years this machine had been involved in 42 accidents in which 50 persons claimed to have been injured.

"Which air channel do we take, second?" Did that near panic-stricken third boy beat Chas. Cod or the second?

Sorry To See Night Coming She Could Not Sleep

Mrs. K. McIlroy, Redcliff, Ont., writes: "I was nervous and run down, was short of breath, and had smothering feelings, and was sorry to see night coming as if I could not lie down or go to sleep."

I was advised to use Milburn's Heart and Nerve Pills. Took seven boxes and am now completely relieved; can sleep all night, and have gained weight.

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Idea Is Not New

Psychologist Believes Murder Preventible By Detecting Criminal Type Early

Murders may be prevented in the near future by the recognition and treatment of the types likely to commit major crimes.

This is the belief of Miss Alice Raven, a leading London psychologist, who has made an exhaustive study of the most famous "murder cases" of present years.

"In all cases of murder I have investigated," she told a newspaper correspondent, "I have found a definite psychological similarity in the murderers."

"Murderers are almost invariably introverts with a sense of hostility towards the world, probably due to an inferiority complex, and they have frequently no power of self-expression."

"Their creative faculties are bottled up within them, and this repression leads to a desire for violence."

"More research is needed on this point, but I am inclined to think that the murderer is a man who has a memory of cruelty in childhood to work off."

Many studies of murder cases and criminal usually show that the murderer is only committed under certain definite conditions, and I am convinced that the psychologist will ultimately be able to recognize the type, even in childhood, likely to commit major crimes, and the social services will take them in hand."

Canadian Shipper

Expert Sees Shipment Of American Mules From Quebec

The possibility that Canadian ports will be used in future in preference to American ports as shipping centers for cattle and horse exports to Europe was foreseen at Quebec by William R. Rowe, leading United States cattle expert, who was surprised the loading of twenty-eight sample heads of American mules consigned to the Italian Government by army purposes, chiefly in connection with artillery.

The animals were sent across on the freighter "Havener" which vessel also carried a capacity cargo of 230,000 bushels of grain for Hamburg.

When asked why the payment for mules as the shipping port, Mr. Rowe said he found that even with the longer rail route to a Canadian port transportation costs were reduced considerably, resulting from a much lower cost of Canadian feed.

The exporters, however, were in charge of the shipment, expressed the opinion that the movement of these animals through Canadian States harbors would be a mistake, meaning that a trade which previously had gone entirely through United States harbors now will be split between the ports of Quebec and Montreal during summer months, and St. John, N.B., to the winter season.

Strangled With Asthma is the only expression that seems to convey what endured by a man suffering from this trouble. The relief from J. D. Kellogg's Asthma Remedy is a measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unqualified remedy is worth many times its price to all who use it.

Newest Excuse For Passing Traffic Light

Alabama Negro Said He Thought It Was Christmas Decoration

Two long-garbed farm mules driven by an aged negro pulled a driving wagon past a red traffic light in Montgomery, Alabama.

Traffic became paralyzed. Motorists shouted; horns tooted in awailing bedlam.

"Hey, you," roared policeman M. H. Collier, trying bravely to untangle the situation. "didn't you see that red light?"

"Yes, sars, I see it long 'fore I got here," the old negro replied with a disarming grin. "I been watchin' it flash red and green as I drive up the street. Ain't no tellin' what you folks gonna do next for Christmas decorations."

So saying, the aged one chuckled to his mules and was on his way, still grinning.

Mrs. Jones "I know your first husband—a fine man—he died because of his rheumatism."

Mrs. Clark—"That's what my present husband says."

"Schools and colleges in Canada teach approximately one-quarter of the country's population annually."

Since 1500 A.D. Iceland has exceeded all other regions in the output of lava from its volcanoes.

WANTS REINFORCEMENTS

According to press reports Central Asia is fomenting with unrest and general fighting is raging all along the Indian Northwest Frontier Province, Lord Willingdon, Viceroy of India (above), is said to have asked for 30,000 rifles to quell the disturbances.

Ends Long Journey

Young Man Went Round World In Small Boat

William Albert Robinson, the young man from Lowell, Mass., who in 1921 set out from New York with the set purpose of circumnavigating the globe in a thirty-two-foot ketch named the "Swamp" (bankrupt for "dream"), brought the same ship along to the dock of the fireboats at the Battery and there, after three years and five months, of sailing, brought his journey to an end.

Robinson said he had visited more than 400 ports; had sailed more than 30,000 miles; once had nearly been run down by a steamship; had been captured in the Red Sea by Arabian pirates; had seen volcanoes and waterfalls; had seen whales and fish; had listened to the drums of the Sannas; had drunk beer had charred before had tasted the durian; had made many strange tales, and had made many friends.

Manitoa Not Changing

Auto License Tax

But Owners In Saskatchewan Pay Five Dollars More

Licenses for motor cars in Manitoba will cost no more for 1922 than this year, and the registration fee will continue to be the same, inquirers of the legislative buildings disclosed.

No change is contemplated in Manitoba. In Saskatchewan, however, fees will be called upon to pay \$5 more for licenses than do owners of motor cars in Manitoba.

Licenses in Manitoba range from \$9 to \$35 in cost, depending on the length of the wheelbase of the car. Registration of motor vehicles other than trucks and trailers cost \$9 for cars not exceeding 100 inches in the length of the wheelbase, and \$25 for every additional five inches in the wheelbase.

Difficult To Understand

Why People Get Any Enjoyment Out Of Gossip

Of all the vices on earth, the one that is the most difficult to understand is the vice of gossip. For most crimes we can find some explanation; for gossip there is no explanation except depravity or insanity. How people can find enjoyment in making life hard for others is one of the eternal mysteries. The shameless activity of malicious tongues has caused more havoc in the world than any other one viciousness.

Keep Douglas' Egyptian Liniment handy. A sure, speedy remedy for burns, sprains, fells, blood poisoning, rheumatism, warts, sores, etc. Invaluable for inflammation and muscular rheumatism.

Airplane Spent Of Wrestling Match Between Tiger and Trainer

A wrestling match between a tiger and a trainer in an airplane flying over the English Channel from France was reported by the London Star.

The tiger was said to have broken out of a large wooden cage and started grappling with his capturer. The cage was torn to shreds and the wrestling was hardly suitable for such an act, the trainer dashed into the cage with the lion clinging to him and closed the door.

They made the rest of the journey apparently in perfect harmony. The pilot and his mechanic were aghast at the events occurring in the cabin behind them.

Discoveries Confirm Report

Geological Mapping of Manitoba Area Indicated Gold Deposits

The discoveries of gold made recently in the Island Lake area of northern Manitoba would appear to confirm the views expressed by Dr. J. P. Wright in the summary report issued by the geological survey, Department of Mines, Ottawa, following the geological mapping of that area in 1921, according to a brief statement issued from the Department of Mines, Ottawa. The statement continues:

"Commenting on the mineral possibilities of the district, Dr. Wright, who paid a further visit to the area during the past summer, states that the geology indicates areas of rock similar to those wherein commercial mineral deposits have been discovered elsewhere within the Canadian shield. Consequently, it is pointed out, the area is one that should be prospected carefully. Favorable rock conditions exist over a large belt, and a great deal of intensive, systematic prospecting will be necessary before a complete picture of the possibilities can be evaluated."

Won War Against Speeders

But Duke Of Marlborough Had To Use Drastic Method

The Duke of Marlborough has won his war against the speed-bugs on his estate.

Some weeks ago, personally inconvenienced by the speeding of motor cars through the private roads of his estates at Blenheim Park, he adopted a novel, if somewhat drastic method of preventing fast driving.

He had two "bumps" built into the roadway near Blenheim Palace, with the result that motorists who stopped at the corner at speed received a timely reminder of their sins.

Speaking recently, the Duke of Marlborough, who had previously expressed his determination to stamp out speeding through his estate, which is noted for its beauty spots, stated that his methods had resulted in the return of normal motoring.

Lumber Trade Improving

Shipments From British Columbia Showing Big Increase

The lumber trade of British Columbia is picking up noticeably. For the first nine months of the current year business in Australia has been greater than at any time since 1927, with exports running to \$3,659,260 feet compared with 29,048,278 feet for the whole of the year 1920. Shipments to China have also been quite large, at 40,280,191 feet for the nine months against 40,974,183 feet for the whole of 1920. Japan's purchases to date amount to \$3,000,000.

Persian Balm quickly relieves chapping, windburn and all roughness caused by weather conditions. Keeps the complexion clear and lovely. Completely absorbed by the skin. Rubbing. Preserves and beautifies. Preserves and enhances natural beauty. Soothes, refreshes and invigorates. Makes hands soft and flawlessly white. Improves that subtle charm so essential to true elegance.

Orders Entire Home Crop

A large shipment of home has been made by J. Mackison, of Hayfield, Manitoba, to eastern Canada. After demonstrating the quality of the honey by being a constant visitor at the Toronto Royal Fair, Mr. Mackison obtained an order from one of the Toronto departmental stores and the company has now placed an order for Mr. Mackison's entire crop.

Creating Real Vacation Trip

Army of Young Workers Transforming Hiding Mountain Park
Young men employed at Hiding Mountain National Park, in Manitoba, on the Dominion relief scheme are working a great transformation in turning the park into a real vacation land that will draw visitors from far and wide. George W. Northwood, supervisor of Dominion relief, said, following his return from an inspection visit to the workers' camp in the park.

The difference is evident when one compares the forest area that has been cleared of entangling brush and fallen timbers with the undisturbed stretches. This work is especially beneficial along the shores of the rippling blue lakes that are found in different parts of the park.

Mr. Northwood found the youths to be well fed and comfortably installed in their bunk houses. A large part of the food supplies is obtained from farmers of the surrounding area, and so the work undertaken is providing agricultural relief as well as unemployment for men from urban centres.

In addition to the bunk houses are recreation halls, a hospital and root houses. The large number of magazines donated by the Dominion relief, Winnipeg citizens through the Free Press, are found in the recreation halls and are much appreciated by the workers.

A resident physician at the park looks after the needs of the men, and Mr. Northwood is arranging for a number of first aid men to go to the camps, so that each camp will have a first aid man prepared for any emergency.

The last contingent of men, 125 in number, have gone to the park. This will bring the number there close to over 1,300. Of the 1,300 men 913 are from Winnipeg, and the remainder from other parts of Manitoba.

Camps for the workers have been constructed from timber cut in the park and cut up in saw mills there. As an example of the swift work done in building the camps, Mr. Northwood told of an instance where a tree was cut down one morning, skidded up the roads from the trap where it was part of a new house before the day was over.

Cutting Down National Debt

Lady Saskatchewan Has Novel Scheme To Reduce Debt
The Dowager Lady Saskatchewan, mother of Sir John Charles Sackville-West, fourth baron Sackville, has conceived a new idea toward cutting down the national debt. She is asking notable people to send her a penny for each year of their lives on their arrival at another birthday.

Lord Darling, the former distinguished judge, who was 82 years of age the other day, has sent seven shillings—\$175—which Lady Sackville admits was two pennies too much.

Her capture recently was Alderman W. W. Kelly, prominent citizen of Birkenhead. Mr. Kelly, celebrating his 75th birthday anniversary, promptly remitted six shillings and fourpence.

Queer Sense Of Humor

The Home, N.Y., Chamber of Commerce suggests that the Alaska "Pan-handle" be traded to Canada for the land south of the St. Lawrence River before a St. Lawrence waterway treaty is negotiated from which it may be assumed the Home Chamber of Commerce is an organization of humorists, or does not want any St. Lawrence money.

The Peace River country, Alberta, has an approximate area of 93,000 square miles.

Porto Rico expects bumper crops this season.

"Ella, on the first landing I met a man staggering drunk. I should be ashamed to come home with him. Who lives on the first landing?"
"Nobody—but there is a mirror there."—Gemmeline Chas, Leipzig.

W. N. U. 1923

B.C. Egg Exports Bring Producers \$5,000 Each Day

Eastern Market Demands Huge Supplies From Ranchers On Coast
British Columbia, Inc. are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of \$5,000 a day.

The B.C. Egg Pool is shipping to prairies and eastern Canada three and four carloads of eggs weekly. Private firms are adding further shipments, which, according to G. B. Wilson, of the poultry division, Ontario Livestock Branch, Windsor, bring the total up to one carload daily.

Each carload at Montreal brings an average of \$7,000. There must be deducted from this freight and handling charges of five cents a dozen.

The egg industry is at present the liveliest department of agriculture in British Columbia. Distribution of \$5,000 a day among poultry ranchers is bound to stimulate confidence in the industry.

Egg prices are much lower this year than at the same time in 1920. Production is also lower this year than last. Nevertheless, present prices are attractive to the coast poultry owners. Lower feed prices and lower labor costs help to make up for the reduced price received for the product.

George F. Wallace, president of the B.C. Egg Pool, reports falling off of production of eggs elsewhere in Canada.

Prof. E. A. Lloyd, University of British Columbia, says that the present export of eggs is but the beginning.

Egg look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic market," said Professor Lloyd.

Catching Insects Proves Profitable

Youths Make \$1,000 To Pay For College Courses
Three youths are attending the Plattville State Teachers' College because of their ability to catch butterflies, moths and wasps bugs.

They caught and sold more than \$1,000 worth.

George Kettler and Leo Speth became partners of Beadle when the business grew so rapidly he could not take care of it himself.

"Collecting insects is sometimes dangerous, but it is always fun," Beadle said. "You're forced to stay in the fields under a broiling sun sometimes to get what you want. You have to go through thickets, briar patches and climb rocks and waste streams."

"Once we were mistaken for bootleggers. Our faces were red and we carried bottles of preservatives containing alcohol. It took persuasive language to convince a deputy sheriff we were 'just college boys.'"

Had Her Own Method

A famous professor "T.E." A. "Tuppi" who insisted on singing out of tune all through one long weary morning. At last, wearied up to the pitch of fury, the professor barked down the lid of the piano and exclaimed: "Some of these I teach they sing the black notes, and some on the white, but, good heavens, as for you, Mademoiselle, you sing in between the cracks!"

The wise parent brings up his children as if they belonged to someone else.

Hon. Leopold MacAulay, Minister of Highways for Ontario, from his most recent portrait.

What Worry Is Just the Operation Of An Imagination Gone Wrong

Gene Tunney says the pugilist requires the greatest self-restraint to keep from fighting the contest of imagination for hours before he enters the ring. Imagination is one of humanity's richest gifts, not an over-worked imagination may prove a curse.

Worry is the operation of an imagination gone wrong. To prove how futile is most of our worrying it is necessary only to remember how many things we worried about never happened.

Most people with sick imaginations are carrying not just their personal worries but a lot of universal fears remotely connected with their own interests and welfare. They worry about the end of the world; the possibility of another world war; the depravity of the times; the failure of the forests; the menace of communism; race suicide; or the danger of overpopulation of the world.

And unfortunately, the people who do the most worrying about these possible but remote evils, have the least capacity for solving their own immediate problems. How good it would be for all of us if we could grasp the meaning of that old saying, "Sufficient unto the day is the evil thereof." We need very little philosophy to take care of the simple business of living. Those who wisest who refuse to fight until they get into the ring and hear the bell.

A Century Old Engine

Celebrated Birthday By Running On Blocks In Museum
Old "John Bull," first steam locomotive to pull American passengers, marked its 100th birthday by running up and running, jacked up on blocks in a museum. It started and delighted a crowd in the Smithsonian Institution just as it shocked the New Jersey into belief in the "iron horse's" century age. Its plumes were lanky and it was compressed air instead of wood they fed it to make it go; but it responded valiantly to controls first operated by a top-hatted engineer at Bordentown, N.J., on November 13, 1831.

We read that a man recently had breath for three and a half minutes. But it was all to no purpose; when he reached the tenth step it squeaked and weakened his wife.

Bitch is rated one of the strongest cabinet woods.

CANADIAN HOCKEY STARS PUTTING UP BIG FIGHT

When the Toronto Maple Leafs opened the Hockey Season in the Maple Leaf Gardens in Toronto, the form they put forth was below par, but with the new inspiration of a change in coaches with the Mick Parkes of Regina at the helm, the "Leafs" are looking up and playing good hockey. Above left and right are two stars, Joe Primeau, left and Chas. Connolly, right, while inset is a picture of Dick Irvin, the new coach.

May Benefit Farmers

New Seed Cleaning Scheme Discovered By Toronto Man
A new system of cleaning seeds which may prove of great value to farmers, has been discovered by Prof. P. C. Dyer and H. L. McClelland in the new machine laboratories at University of Toronto.

By recognizing and making use of a physical characteristic of seeds, apparently overlooked previously, the two men have been able to reduce weed seeds in alfalfa, sweet clover, red clover and alfalfa to an infinitesimally small number.

Under the new process, Prof. Dyer and McClelland have been able to take alfalfa containing 100 catch fly seeds to the dunes and clean it until there remained only four of the noxious weed seeds. Similarly they have attracted bladder campion and white rocks from the above types of fodder.

Observations in connection with the experiment revealed the vulnerability of clover was not so great as that of the weed seeds. After the fodder seed was treated to a slight extent its viability had attained the maximum, while the weed seed continued to be wetted, and by this time the two were able to be separated.

The apparatus utilized was simple, they said. It was little more than a rotating band and a tub of water.

Gold Rings Fill Teeth

Germany Imposes Restrictions On Gold Being Used In Industry and Dentistry
To protect Germany's inadequate stock of gold, the German Government has imposed restrictions on the metal for use in industry and the arts—a dentist, for example, is permitted to use only \$50 worth a month.

As a result, gold rings, chains and jewelry mountings having been triching into dentists' offices to be converted into fillings, bridge work and the like.

Fortunately, there is nothing more contagious than a smile. There is something wrong with a man or woman who cannot respond to a smile. Of course, there are patriotic Germans, who received in exchange rings made of iron and bearing the inscription, "The gold I gave for iron." Such iron watch chains are still seen on many German waitresses.

What the World Needs

Is More Smiling People and Fewer Gloom Spreaders
We have had many kinds of "Good Humor" and what not. But it remains for Geneva to provide something new in this line. It is known as "Good Humor Week."

It was initiated by the newspaper La Suisse, and the effects are said to be noticeable in the streets. Nor is it any easier for the people of Geneva to smile than in other cities. The citizens there have, according to a dispatch, been having a tough time.

We are told that thousands of francs have been lost, banks have smashed, money has depreciated, trade which had Americans are not arriving at the mountain resorts. But nevertheless the people are smiling.

We should like to see this "Good Humor Week" observed all over the world. Dear knows, it is needed. For too long the world has been weeping a long face. There have been good humor and smiles and even loud laughter, but not nearly as much as there should be, and many of the manifestations of joy have been confined, on the principle of a person trying to keep his courage up. This gaiety, too, whether forced or spontaneous, has been confined to a comparatively few. Too many people have fallen into the habit of wearing solemn faces and speaking in serious if not sepulchral tones.

The world stands desperately in need of a renaissance of smiling faces. If a continuous smile could be made to span the globe a lot of deplorable and vain and stupid gloom. Optimism would chase away pessimism. It is hard to create optimism when the majority of the people are disappointed through the loss of glass. Smiles and the world taken on a poor appearance. Difficulties through through smiling faces are not nearly so formidable and formidable as when seen through those that are sombre and tear-laden.

Fortunately, there is nothing more contagious than a smile. There is something wrong with a man or woman who cannot respond to a smile. Of course, there are patriotic Germans, who received in exchange rings made of iron and bearing the inscription, "The gold I gave for iron." Such iron watch chains are still seen on many German waitresses.

Miners Want Freight By Sea

Would Use Air Transport From Buttes Coppering and Great Bear
Demanded of mining interests which have spent \$2,000,000 in preliminary development of great copper, silver and pitchblende prospects in Great Bear Lake and Coppermine River area for a freight service by sea from Vancouver to Coronation Gulf have been heard as far south as San Francisco.

It is rumored that San Francisco shipping interests are seriously considering understanding agreements of mining supplies, particularly gasoline, which is within easy flying distance of the largest operations on Great Bear Lake.

Adding his voice to those of other mining men who have investigated the recent developments on Great Bear, Col. J. H. "Jim" Cornwall, who spent all last summer and many years previously in that country, suggests that Canadian interests should step in while the stepping is good. There is no reason, he says, why fourteen cents a pound for this business. Col. Cornwall has transported freight on the Mackenzie for years and knows conditions.

"It costs fourteen cents a pound, or \$30 a ton to get freight from Waterways, the end of steel, to Great Bear, Col. J. H. "Jim" Cornwall, who spent all last summer and many years previously in that country, suggests that Canadian interests should step in while the stepping is good. THE HOUSE OF DREAMS-COME-TRUE

- BY -

MARGARET FEDLER

The Special Feature of The Herald of the House of Dreams-Come-True, Ltd., London, England.

CHAPTER IX.—Continued.

Nick at once established himself at Jean's side kindly informing her that now that his lover was satisfied he was prepared to make himself agreeable. Upon which Lady Anne apologized for his manners and Nick interrupted her, volubly pointing out that the fault, if any (which he denied), was entirely hers, since she had been responsible both for his upbringing and inherited tendencies. They both talked at once, wrangling together with huge rest and enjoyment, and it was easily apparent that the two were very close friends indeed.

Blaise took no part in the stream of chatter and nonsense which ensued but stood a little apart, his shoulders propped against the chimney-piece, drinking his coffee in silence. Jean's glance wandered reflectively from one brother to the other. They presented a striking contrast, the stern dark-browed, high-crowned elder man, with its bitter-looking mouth and that strange white streak across his dark hair, and the bubbling, blue-eyed charm of the younger. The difference between them was as definite as the difference between sunlight and shadow.

Nick was full of plans for Jean's entertainment, suggesting for boating and tennis occupying a prominent position in the programme he sketched out.

"It's really quite jolly paddling about on our lake," he rattled on. The stream that feeds it hails from Dartmoor, of course. All Devonshire streams do, I believe—at least, you'll never hear of one that doesn't, the Moor being your pocket-potential. Besides, people always believe that your water supply must be of crystalline purity if you just casually mention that its source is in Dartmoor spring. So of course, we all swear to the Dartmoor origin of our domestic waterworks. It sounds lovely—even if it not always strictly true."

"Miss Peterson must be a little difficult to follow your train of thought," commented Blaise a little sharply. "A moment ago you were discussing boating, and now it sounds as though you'd shortly involve yourself—and us—in a disposition upon hygiene."

Nick smiled placidly. "My enthusiasm got away with me a bit," he admitted with unfeigned calm. "But I haven't the least doubt that Miss Peterson will like to know these few reassuring particulars. However—"

And he forthwith returned enthusiastically to the prospect of tennis and kindred pastimes. Once again Blaise broke in ungraciously. It seemed as though, for some reason, Nick's remarks were heard with a keenness and a keenness of hearing that the dozen different plans he was proposing for Jean's future diversion, irritated him.

"Your suggestions seem to me remarkably neat, Nick," he observed exultantly, "seeing that at present it is midwinter and the lake frozen over about a foot deep. Quite conceivably, by the time that tennis and boating become practicable, Miss Peterson may not be here. She may get tired of us long before the summer comes," he added quickly, as though in a belated endeavour to explain away the suggestion of inhospitability which might easily be inferred from his previous sentence.

But if the happy addition were intended to reassure Jean, it failed of its purpose. The idea that her coming to Stagle was not particularly acceptable to his master had already taken possession of her. It was the consequence of the conversation she had overheard at the hotel, Tor-

marin's reluctantly given welcome when he met her at Combe Bay. The feeling had served to increase her feeling of embarrassment. And now, this last speech, though so hastily qualified, convinced her that her advent was regarded by her host in anything but a pleasant light.

"Yes, I don't think you must count on me for the tennis season, Mr. Brennan," she said quickly, "I don't propose to blight myself on you indefinitely, you know."

"Oh, but I hope you do, my dear," Lady Anne interposed with a simple directness there was no doubting. "You must certainly stay with us till your father comes home, and—with a smile—unless Glyis has altered considerably, I imagine Blaise will not see him again under a year."

"But it couldn't possibly foot myself on to you for a year?" exclaimed Jean. "That would be a sheer imposition."

Lady Anne smiled across at her. "My dear," she said, "I've never had a daughter—only these two great, unmanageable sons—and I'm prepared to play at having one. You're not going to disappoint me, I hope?"

There was something irresistibly winning in Lady Anne's way of putting the matter, and Jean jumped up and kissed her impulsively. "I should hate to," she answered warmly.

But she evaded giving a direct promise; there must be a clearer understanding between herself and Tom before she could accept Lady Anne's hospitality as frankly and freely as it was offered.

The opportunity for this clearer understanding came with the entry of Blaise, the butler, who brought the information that a favouring young sister of Nick's had been taken ill and that the stablemen feared the dog and cat were ill.

Nick sprang up, his concern showing in his face.

"I'll come out and have a look at it," he said.

"I'll come with you," added Lady Anne.

Nick slipped her hand through his arm and they hurried off to the stables, leaving Blaise and Jean alone.

For a moment neither spoke. Blaise, smoking a cigarette, remained standing soberly in the hall. Apparently he did not regard the occasion as one for talk conversation, and Jean felt miserably nervous about reaching the subject of her visit. At last, however, fear lest Lady Anne and Nick should return before she could do so, drove her into speech.

"Mr. Tomlinson," she said quickly—to assure herself that some word had guessed the flurry of shyness which underlay her cool little voice—"I am sure you will have to put up with me for a week or two, but I promise you I will try to make other arrangements as soon as I can."

"You don't mind my being abruptly," he demanded. "It was evident from the first that you were not one of those who would rather be alone than have a voice that something had aroused his anger, though whether it was the irritation consequent upon her presence or an impulsive desire to show her speech as censuring his attitude, Jean was unable to determine. It was attended by many prominent people, the question of which she quailed a little beneath their glances; outwardly, however, she retained her composure.

"I think my meaning is perfectly clear," she returned with spirit. "Even at the station you made it quite evident that my appearance came upon you in the light of an unpleasant surprise. And from what you said just now to Mr. Brennan—it is obvious you hope my visit will not be a long one."

If she had anticipated spurring him on by an impulsive declaration, she was disappointed.

"I am sorry I have failed so largely in my duties as host," he said cordily.

The apology, uttered with such an entire lack of ardour, served to emphasize the offence for which it pressed to ask pardon. Jean's face whitened. She would hardly have felt more hurt and astonished if he had struck her.

"I—I—" she began. Then stopped, finding her voice suddenly.

That she had heard the break in the low, harsh tones, and in a moment his mood of intolerant anger vanished.

"Forgive me," he said remorsefully—and there was genuine contrition in his voice now. "I'm a cross-grained fellow, Miss Peterson; you'll find that out before you've been here many days. But never think that you are unwelcome at Stagle."

"Then why—I don't understand you," she stammered. He found his sudden changes of humour bewildering.

He smiled down at her, that rare, strangely sweet smile of his which

when it came always seemed to transform his face, calling forth the harsh sternness of his lines.

"Perhaps," he said, "I don't understand either," he said gently. "Only I know it would have been better if you had never come to Stagle."

"Then—you wish I hadn't come?"

"Yes," he said slowly. "I think I do wish that."

"She looked at him a little wistfully. "I wish that you were angry—because I've come here? Lady Anne—and Mr. Brennan seemed quite pleased," she added as though in protest.

"No doubt," Nick, lucky devil, has no need to economize in drastic moments."

She felt her cheeks flush under the look he bent upon her, but she forced herself to meet it.

"And—and you?" she questioned very low.

"I have," briefly.

It was long before sleep visited Jean that night. The evens of the day marched processionally through her mind, and her thoughts persisted in clattering round the leading, incomprehensible personality of Blaise Tomlinson.

His extreme bitterness of spirit ascribed to the unfortunate episode that lay in his past. But she could find no reason for his strange, expressed wish to disregard their former meeting at Montevau—to wipe out, as it were, all recollection of it.

That he did not dislike her she felt sure; and a woman rarely makes a mistake about a man's personal feelings. But for some reason, it seemed to her, he was afraid to let himself like her. It was as though he were anxious to hold her at the door against any possibility of friendship between them. From whichever way she looked at it, she could find no key to the mystery of his behaviour. It was inexplicable.

Only one thing emerged from the confusion of thought—the last glimpse of our that night at Montevau had returned—returned with fresh impulse and persistence. And why, at last she was asleep, it was with the beseeching, soul-crying melody of "Val's Triste" haunting her ears.

(To be continued.)

Prince Stresses the Value of Advertising

Urges Nation to Keep Great Britain Before the World

The Prince of Wales urged the nation to let the world that Great Britain "is still alive" and able to take advantage of the most modern method of advertising.

Addressing the annual meeting of the Travel Association, the British heir lived up to his reputation as the Empire's best salesman when he quoted a modernized version of an old rhyme:

"Early to bed and early to rise: 'You'll simply bust if you don't advertise."

"Too little is known abroad of what Britain and Ireland have to offer," the Prince said, "while there is so much talk of financial and industrial difficulties which we, in common with every other country, are suffering."

The Prince told the meeting, at which Lord Derby presided and which was attended by many prominent people, that 200,000 men from all parts of England, that the stoppage of British pleasure touring abroad was merely an emergency measure, due to the financial situation.

Water Had His Joke

"Give me an appropiated steak, waiter. Smothered in mushrooms, you know."

"It is obvious you hope my visit will not be a long one."

"I am sorry I have failed so largely in my duties as host," he said cordily.

The apology, uttered with such an entire lack of ardour, served to emphasize the offence for which it pressed to ask pardon. Jean's face whitened. She would hardly have felt more hurt and astonished if he had struck her.

"I—I—" she began. Then stopped, finding her voice suddenly.

That she had heard the break in the low, harsh tones, and in a moment his mood of intolerant anger vanished.

"Forgive me," he said remorsefully—and there was genuine contrition in his voice now. "I'm a cross-grained fellow, Miss Peterson; you'll find that out before you've been here many days. But never think that you are unwelcome at Stagle."

He smiled down at her, that rare, strangely sweet smile of his which

Millionaires Are Fewer

Reduced By Half in U.S. After Stock Crash of 1929

That there are 23,400 fewer millionaires in the United States than there were before the stock market crash is one of the striking revelations of the disastrous effects of the business depression made by the Internal Revenue Bureau's statistics of income for 1930 issued at Washington.

If a millionaire is defined as a person with not less than a million dollars of property, the income from which is \$50,000 or more, there were 43,184 millionaires in the heyday of the boom times in 1929. The stock market crashed in October, 1929, leaving 38,600 persons reporting incomes of \$50,000 or more for that calendar year. In 1930, however, the number of millionaires had fallen to 10,688.

The figures showing less than half as many millionaires with about one-third of their former incomes will have an important bearing upon tax legislation in the approaching session of Congress to meet the two billion dollar treasury deficit looming for this fiscal year.

THE RHYMING OPTIMIST

By Alice Michaels

LIVE AKE

All the trees in the forest.
Bow to the winter's will,
Flinging their bright-hued leaves
To the cold, cold, cold, cold.

Shuddering, bare and chill.
All the trees in the forest.
Scatter their leaves of gold,
Scatter their leaves of red and bronze.

Have they staid, and cold.
All the trees in the forest.
Fling the cold, cold, cold, cold,
Live ake, who clings to his robe of green.

Carves out that summer has flown.
I would be, like the oak tree,
Danceless in winter's blast,
Clothed with the joy of sunbright hours.

And the memories of the past.
Companion Was Harmless

Indian Trapper Discovered His Sleep
In Cabin With Bear

Once upon a time—quite recently in fact—Peter John, an Indian trapper of the Rama band, was walking through the woods near Orellia, Ont. Here and there he spotted his traps. It was getting dark and the reserve was long way from Peter John. So he decided to spend the night in an old cabin. In the cabin were two beds, a little bed and a big bed.

So Peter John climbed into the big bed and went to sleep. In the morning, Peter John was awakened by a visitor and a whining noise and a couple of yawns. So he looked into the little bed and there he saw what he thought was a man in a fur coat. Peter John said "hello," but there was no answer. He reached out and shook the fur coat. And the fur coat uncircled itself, uttered a loud "woof" and a couple of grunts and went away very quickly.

And Peter John said it was the first time, as far as he knew, he had ever slept quite so close to a bear.

Girls Are Advised
To Marry Farmers

More Chances For Having Happy Home, and Fewer For Divorce

Girls eager for the best chance for domestic happiness were advised by married farmers by Mrs. Elsworth Richardson of Albia, Iowa, the only woman to have received the distinguished service medal awarded by the American Farm Bureau Federation.

"The girl who marries a farmer has a much greater opportunity for a happy home and a fuller home life than the girl who goes down the middle aisle with a city dweller," she said.

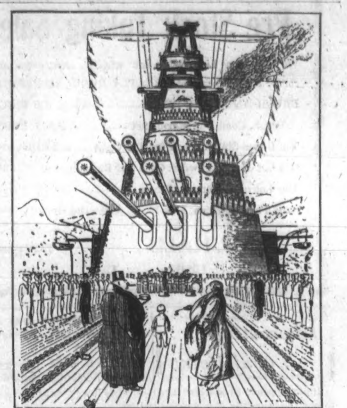

The farm, she said, brings a man and his wife into closer community of interests than is generally possible in city life.

Many mothers have reason to bless Mother Graves' Warm Extremities, because it has relieved the little ones of suffering and made them healthy.

See County, Iowa, raises more popovers than any other county in the United States and probably more than any other similar area in the world.

Soviet Russia is beginning to ship lumber into Iraq.

Germany is Europe's largest leather producing country.

THE CHRISTMAS PRESENT

"Why did you buy him such a big one, Henry? The child's too young to appreciate it."—The Passing Show, London, England

Little Helps For This Week

"Now we exhort you, brethren, warn them that are ignorant of the foolishness, alight the weak, be patient toward all men."—1 Thessalonians v. 14.

What are we set on earth for? Say, we tell.

Nor seek to leave the tending of For all the least of you it decides And don't mind the curfew shall work alone.

God did appoint thee with His order To wrestle, not to resign; and His All thy tears over like pure crystal lines.

For younger fellow-workers of the soil To wait for annals. So others shall.

To wait, patience, labour to their heart and hand.

From thy hand, and thy heart, and thy hand; they have cheer;

And God's grace fruitfully through thee to all.

The least flower with a brimming cup may stand.

And share its dew-droplet with another man.

—Elizabeth Barrett Browning.

Every man and woman trying to be honest, pure, and helpful in his world finds that the very highest work set before them is self-sacrifice.

Very few of us have the chance of heroic self-devotion, but every day brings the petty, wearing sacrifice which weighs full weight in God's scales.—Samuel Cagdon.

Miller's Form Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them without worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

"What forest is that down there?" "Couldn't say for certain, but I fancy it's Amy Johnson Wood! Anyway, we're not far from Burma according to that chap in the aerial-ship we passed just now."

Greenland ranks as the world's largest island. New Guinea comes second.

Japan appears to be determined to put the "cure" in Manchuria.

A meeting of the skating rink committee will be held in the local armory on Friday evening of this week at 8 o'clock. A full attendance is desired.

The Ladies' Aid of Gordon Memorial Church will hold their annual Burns supper this year on January 25th as usual. More particulars later.

The ice at the skating rink has been in excellent condition for the past week and the rink has been fairly well patronized by the young folk. The Review would suggest that the hockey enthusiasts get busy and give us a few games while the weather is suitable.

Automobile licenses in Alberta go back for 1932 to their former price, and advance of \$5.00 over last year's rate. Premier Brownlee made this announcement Monday, and all necessary provision for the distribution of forms and plates having been previously arranged, the issue of new licenses will now proceed throughout the province.

John Wallace brought to this office, two pullet's eggs which he figures are record breakers for this season. One egg measures nine inches around the end and 7 inches around the middle. The other is 8 1/2 inches around the end and 6 1/2 inches around the middle. Besides having yolks and whites of their own, both eggs had another perfectly formed egg of the usual size, shell and all, inside. Both eggs were laid by a last May's pullet. If this bird keeps on laying two eggs at a time she should be eligible to enter the egg-laying contest.

Mayor Barrymore was again elected Mayor of Lethbridge.

Mrs. A. E. Ward left yesterday for Edmonton where she will visit her parents for a few weeks.

Mrs. J. R. MacKenzie, who was called east two weeks ago owing to the sudden death of her father, is expected home this week end.
